## Profile Summary

Full Stack Web Developer who specializes in the MERN Stack with a bachelor's degree in Business Administration. I'm always looking to solve problems and never overlook the little details. With a background in client relations and building and maintaining relationships with organizations and clients, I have provided excellent client support and ensured client satisfaction. Enthusiastic and hard-working team player with a passion for creating beautiful and functional user interfaces and experiences.

## Technical Skills

**Languages:** JavaScript, HTML, CSS, SQL

**Tools:** Git, GitHub, Git Bash, Heroku, Visual Studio Code, Insomnia, MySQL

**Front-End:** jQuery, Bootstrap, Handlebars.js, React, Third Party APIs

**Back-End:** Express.js, Node.js, SQL, Sequelize, Jest, MongoDB, NoSQL, Mongoose, npm, JSON

## Personal Projects

### **Supreme Reminders**

Created an Email Random Information Generator that generates random This Day in History facts and quotes.

- Collaborated with a team of 3 in order to create this custom-coded, engaging, web application using HTML5 and CSS3 and Web API'S
- Personally contributed to both the front-end and back-end of this project.
- Displayed the information from the fetch API to appear in the email generator and store the data in local storage using JavaScript
- Repo: <https://github.com/SAziz24/Supreme-Reminder/>
- Deployed: <https://saziz24.github.io/Supreme-Reminder/>

## **Kinetic Tickets**

Created a fully functioning ticketing system without all the complications, frills and expenses you don't need. This is an ultra -simple, ultra-minimalistic ticketing system for users who don't need A-Tier systems. This application allows users to create an account, login, and logout.

- Collaborated with a team of 3 in order to create a user-friendly application using MVC paradigm
- Personally contributed to both the front-end and back-end of this project.
- Created API and page routes for models using CRUD and rendering pages with Handlebars.
- Major technologies used were Handlebars, Jest, Express, mySQL, and Passport
- Repo: <https://github.com/SAziz24/Kinetic-Tickets/>
- Deployed: <https://evening-tor-60812.herokuapp.com/>
